Marine Systems Technician – Apprentice
Location: Holland, Michigan
Job Type: Full-Time
Company: Jefferson Beach Yacht Sales

About Jefferson Beach Yacht Sales
Jefferson Beach Yacht Sales (JBYS) is a leading yacht dealership providing yacht sales, brokerage, service, finance, and insurance services. Our service team supports sophisticated vessels and marine systems aboard yachts ranging primarily from 30 to 100 feet, throughout 7 locations in the Great Lakes and two on Naples Florida.
Our technicians work with advanced electrical, electronic, mechanical, navigation, entertainment, climate-control, propulsion, and vessel-management systems found aboard today's luxury yachts.

About the Opportunity:
Jefferson Beach Yacht Sales (JBYS) is looking for a mechanically and technically inclined individual to join our Holland service team as a Marine Systems Technician apprentice.
We are looking for someone with professional work experience, strong mechanical or electrical aptitude, good problem-solving skills, and a genuine desire to learn.
If you have experience in automotive, electrical, electronics, HVAC, manufacturing, industrial maintenance, mechatronics, robotics, field service, engineering technology, or another technical trade, your skills may transfer very well to the marine industry.
JBYS will provide opportunities to shadow and train under our most experienced systems specialist for marine-specific training and continued technical development.

What You'll Do
- Troubleshoot, diagnose, service, and repair onboard yacht systems.
- Work with AC/DC electrical, electronics, HVAC, mechanical, plumbing, navigation, A/V, and software-controlled systems.
- Prepare and commission new vessels for customer delivery.
- Test vessel systems and identify necessary repairs or adjustments.
- Install and service marine equipment according to manufacturer specifications and industry standards.
- Travel to marinas and customer locations as needed may require cross-state travel to one of our 9 locations.
- Maintain accurate documentation of work performed.
- Participate in manufacturer and industry training.
- Maintain a clean, professional work environment and provide white glove service and protection of our customers' vessels while performing the needed work.

What We're Looking For
- Professional work experience with demonstrated reliability and a strong work ethic.
- Mechanical, electrical, electronic, or technical aptitude.
- Strong troubleshooting and problem-solving abilities.
- Curiosity and a willingness to continually learn new systems and technology.
- Ability to work independently and as part of a team.
- Attention to detail and respect for high-value customer property.
- Comfort working aboard boats, around water, at heights, and in confined spaces.

- Valid driver's license and good driving record.
- Ability to travel occasionally for training or vessel support.

Technical education, certifications, marine experience, boat-handling experience, and ABYC certification are preferred but not required.

Why JBYS?
This is an opportunity to turn your existing technical abilities into a specialized career working on sophisticated yachts and advanced onboard technology.

If you like figuring out how things work, solving problems, working with your hands, working outside on beautiful yachts, and learning new technology, we want to hear from you.

We'll teach you the marine side. You bring the aptitude, curiosity, work ethic, and willingness to learn.

Pay: Starting at 22.00 / Hour

Benefits:
- 401(k)
- 401(k) matching
- Dental insurance
- Health insurance
- Paid time off
- Vision insurance
